PROFESSIONAL SUMMARY

Results-driven Artificial Intelligence graduate with hands-on experience in machine learning, deep learning, and full-stack AI system development. Proven ability to design and deploy end-to-end AI solutions using Python, TensorFlow, and FastAPI. Skilled in building multimodal systems integrating computer vision, speech processing, and NLP. Adept at translating complex research into practical applications, with a strong foundation in CNNs, LSTMs, and emotion recognition systems. Seeking a role in AI/ML engineering, data science, or software development to contribute technical expertise to impactful, real-world projects.

TECHNICAL SKILLS

- Programming Languages: Python, C++, SQL
- Machine Learning & Deep Learning: ANN, CNN, RNN, LSTM, TensorFlow, Keras, Scikit-learn
- Computer Vision & Audio: OpenCV, DeepFace, Librosa, RAVDESS, CREMA-D
- Backend & APIs: FastAPI, SQLAlchemy, SQLite, RESTful API Design
- Databases: MySQL, PostgreSQL, SQLite
- Tools & Platforms: Git, GitHub, MS Office (Word, Excel, PowerPoint), Jupyter Notebook, n8n (Workflow Automation)
- Core Competencies: Data Preprocessing, Model Training & Evaluation, Multimodal AI, Emotion Recognition

PROJECTS

Healthcare Empathy AI – Multimodal Empathy Training System for Doctors 2025 – 2026

Final Year Project

- Designed and developed a full-stack AI system to train and evaluate doctors on empathetic patient communication using real-time multimodal analysis.
- Built a Speech Emotion Recognition (SER) module using CNN and LSTM architectures trained on RAVDESS and CREMA-D datasets for audio-based emotion detection.
- Integrated DeepFace and OpenCV for real-time facial expression analysis to score non-verbal empathy indicators during simulated consultations.
- Developed RESTful backend with FastAPI and SQLAlchemy over SQLite, providing detailed session-based performance feedback and improvement suggestions.
- Technologies: Python, TensorFlow, Keras, Librosa, DeepFace, OpenCV, FastAPI, SQLAlchemy, SQLite, Bootstrap, Chart.js

Facial Emotion Detection System 2024

Personal Project

- Built a real-time facial emotion detection application using DeepFace and OpenCV capable of detecting 7 distinct emotional states via webcam or static image input.
- Implemented an optional custom CNN training pipeline using the FER2013 dataset from Kaggle for domain-specific model fine-tuning.
- Technologies: Python, DeepFace, OpenCV, Keras, FER2013 Dataset.

EDUCATION

National University of Modern Languages (NUML), Islamabad 2022 – 2026

Bachelor of Science in Artificial Intelligence (BSAI)

Relevant Coursework: Machine Learning, Deep Learning, Computer Vision, NLP, Database Management, Software Engineering, Professional Practices

IMCB I-10/4, Islamabad 2020 – 2022

Intermediate — Pre-Engineering

ADDITIONAL INFORMATION

- Languages: Urdu (Native), English (Professional Proficiency)
- Interests: Applied AI Research, Healthcare AI, Computer Vision, Competitive Programming
- Available for full-time roles, internships, and remote/on-site opportunities in Islamabad/Rawalpindi
